Copies of these notebook pages, attached as Exhibits A-C, and internal IFF invention disclosures/presentations, attached as Exhibits D-F, specifically identified below, show that the applicants constructed catatonically coated polymeric encapsulated fragrances and validated the enhanced deposition of encapsulated fragrance material further coated with cationic material in rinse-off applications.

THAT, Exhibit E is a true copy of an internal IFF Power Point Presentation prepared by Johan Pluyter entitled "Yosemite Patent Update", and although not dated company electronic records indicate the last revision was made on June 3, 2002;
